

# Futures 2040 Neighborhood Meetings

The Metropolitan Topeka Planning Organization (MTPO), along with the consulting team of RDG Planning & Design, WSP/Parsons Brinckerhoff and Venice Communications, Inc., is developing Futures 2040, the Regional Transportation Plan for the Topeka metro. Futures 2040 will guide major transportation decisions for the Topeka region in the coming years, including local, state, and federal transportation projects. It does so holistically, looking at all modes of transportation, including walking, biking, transit, cars, and trucking.

In order to determine localized priorities across the region, public meetings are being held in four separate geographic neighborhoods during November. The meetings will highlight transportation projects already funded in each area and provide an opportunity for the public to identify other projects/issues. It is imperative that Futures 2040 reflect the desires of the people who live, work, shop and play in the metropolitan Topeka region. Funding for future State, County, City, and Transit projects ultimately start with this plan.

To find out when and where you can participate, see the map above for each area!
